Compared with other dimensions of integration, social integration focuses more on the degree to which immigrants adapt local customs, social relations, and daily practices. It is usually measured through social network, language, and intermarriage. The most commonly used indicator of social integration is social network, which refers to the connection that immigrants build with others in the host society. While some researchers use the total number of immigrants' friends as a measure, others use the frequency of interaction with friends. One thing worthy noting is that more and more studies differentiate local friends from immigrant friends because the former is considered more important in integrating immigrants into the local society than the latter. Language is another important variable to access the degree of immigrants' social integration. A higher level in grasping local language results in more chances to communicate with local people and a better understanding of local culture. A typical question used in survey is as "Do you understand the local people's language?" In the United States, for instance, the

MEDIA CIRCUS IS A COLLOQUIAL METAPHOR, OR IDIOM, DESCRIBING A NEWS EVENT FOR WHICH THE LEVEL OF MEDIA COVERAGE — MEASURED BY SUCH FACTORS AS THE NUMBER OF REPORTERS AT THE SCENE AND THE AMOUNT OF MATERIAL BROADCAST OR PUBLISHED — IS PERCEIVED TO BE EXCESSIVE OR OUT OF PROPORTION TO THE EVENT BEING COVERED. COVERAGE THAT IS SENSATIONALISTIC CAN ADD TO THE PERCEPTION THE EVENT IS THE SUBJECT OF A MEDIA CIRCUS. THE TERM IS MEANT TO CRITIQUE THE COVERAGE OF THE EVENT BY COMPARING IT TO THE SPECTACLE AND PAGEANTRY OF A CIRCUS. USAGE OF THE TERM IN THIS SENSE BECAME COMMON IN THE 1970S. IT CAN ALSO BE CALLED A MEDIA FEEDING FRENZY OR JUST MEDIA FRENZY, ESPECIALLY WHEN THEY COVER THE MEDIA COVERAGE. ALTHOUGH THE IDEA IS OLDER, THE
