Compared with other dimensions of integration, social integration focuses more on the degree to which immigrants adapt local customs, social relations, and daily practices. It is usually measured through social network, language, and intermarriage. The most commonly used indicator of social integration is social network, which refers to the connection that immigrants build with others in the host society. While some researchers use the total number of immigrants' friends as a measure, others use the frequency of interaction with friends. One thing worthy noting is that more and more studies differentiate local friends from immigrant friends because the former is considered more important in integrating immigrants into the local society than the latter. Language is another important variable to access the degree of immigrants' social integration. A higher level in grasping local language results in more chances to communicate with local people and a better understanding of

For those who are unmarried, they will be asked: "Would you consider marrying a local people?"; for those married, question will be like "Would you like your children to consider marrying a local people?" Answers to these questions are a good predictor of immigrants' willingness to be integrated into the host society. In many instances education is used as a mechanism for social promotion. Neither education nor work can be ensured without a form of law. In relation to tolerant and open societies, members of minority groups often use social integration to gain full access to the opportunities, rights and services

6 PT

Compared with other dimensions of integration, social integration focuses more on the degree to which immigrants adapt local customs, social relations, and daily practices. It is usually measured through social network, language, and intermarriage. The most commonly used indicator of social integration is social network, which refers to the connection that immigrants build with others in the host society. While some researchers use the total number of immigrants' friends as a measure, others use the frequency of interaction with friends. One thing worthy noting is that more and more studies differentiate local friends from immigrant friends because the former is considered more important in integrating immigrants into the local society than the latter. Language is another important variable to access the degree of immigrants' social integration. A higher level in grasping local language results in more chances to communicate with local people and a better understanding of local culture. A typical question used in survey is as "Do you understand the local people's language?" In the United States, for instance, the fluency of English is an widely used indicator and can be easily found in a report on immigration. Intermarriage is also an indicator of social integration. For those who are unmarried, they will be asked: "Would you consider marrying a local people?"; for those married, question will be like "Would you like your children to consider marrying a local people?" Answers to these questions are a good predictor of immigrants' willingness to be integrated into the host society. In many instances education is used as a mechanism for social promotion. Neither education nor work can be ensured without a form of law. In relation to tolerant and open societies, members of minority groups often use social integration to gain full access to the opportunities, rights and services available to the members of the mainstream of society with cultural institutions such as churches and civic organizations. Mass media content also performs a social integration function in mass societies.

IT IS USUALLY MEASURED THROUGH SOCIAL NETWORK, LANGUAGE, AND INTERMARRIAGE. THE MOST COMMONLY USED INDICATOR OF SOCIAL INTEGRATION IS SOCIAL NETWORK, WHICH REFERS TO THE CONNECTION THAT IMMIGRANTS BUILD WITH OTHERS IN THE HOST SOCIETY. WHILE SOME RESEARCHERS USE THE TOTAL NUMBER OF IMMIGRANTS' FRIENDS AS A MEASURE, OTHERS USE THE FREQUENCY OF INTERACTION WITH FRIENDS. ONE THING WORTHY NOTING IS THAT MORE AND MORE STUDIES DIFFERENTIATE LOCAL FRIENDS FROM IMMIGRANT FRIENDS BECAUSE THE FORMER</p>
